

git - ours & theirs

cleaner merges for everyone

by Nitay Megides
please report issues on github

git merge

let's merge conflicting branch `feature` into `master`

```
$ git checkout master
$ git merge feature
Auto-merging Document
CONFLICT (content): Merge conflict in codefile.js
Automatic merge failed; fix conflicts and then commit
the result.
```

either fix the conflict manually by editing codefile.js, or use

```
$ git checkout --ours codefile.    $ git checkout --theirs codefile.js
```

to select the changes done in `master` to select the changes done in `feature`

then, continue as you would normally merge

```
$ git add codefile.js
$ git merge --continue
[master 5d01884] Merge branch 'feature'
```

git rebase

let's rebase conflicting branch `feature` over `master`

```
$ git checkout feature
$ git rebase master
First, rewinding head to replay your work on top of
it...
Applying: a commit done in branch feature
error: Failed to merge in the changes.
...
```

either fix the conflict manually by editing `codefile.js`, or use

```
$ git checkout --ours codefile.    $ git checkout --theirs codefile.js
```

to select the changes done in `master`

to select the changes done in `feature`

then, continue as you would normally do

```
$ git add codefile.js
$ git rebase --continue
Applying: a commit done in branch feature
```
